Put an AI assistant to work in your business

Most people use AI to get answers. I help small businesses go one step further: an AI assistant that does the routine work for you, and checks with you before anything goes out.

Step 1
Free conversation
Free 30 minutes

- Describe a real problem in your business
- See a short live demo that fits it

Step 2
Working session
$250 about 2 hours

- We solve one real problem together on screen
- You leave with a concrete result: a plan, checklist or PDF

Step 3
Setup package
from $750

- Your own AI assistant account
- One or two assistants set up for your routine work
- Email and calendar connected safely: you approve before anything goes out
- Two follow-up coaching calls

Step 4
Ongoing coaching
$200 a month

- A monthly check-in to tune your assistants
- Add new tasks as you grow

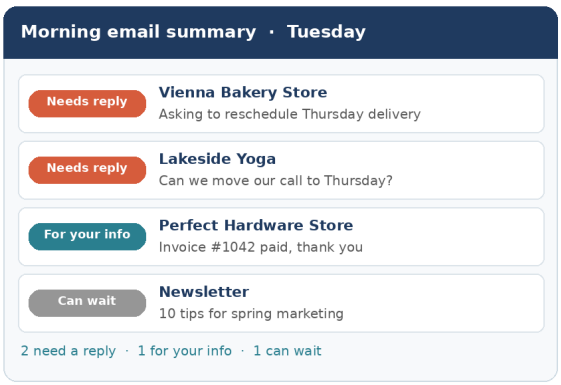

Prices in Canadian dollars. Your assistant subscription is paid directly to the provider (about US$30 a month).

What an assistant can do for you

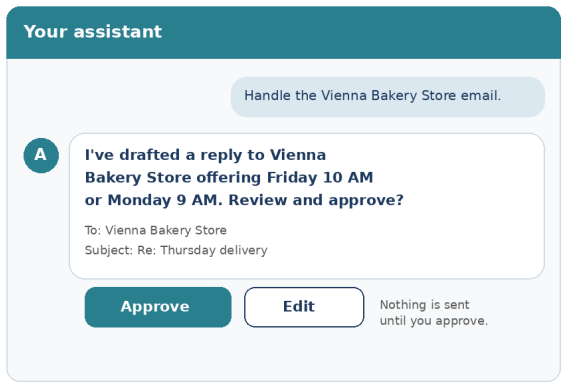

It reads your email, tells you what matters, and drafts the replies. You approve before anything is sent.

Example 1: each morning, your assistant sorts your email and flags what needs a reply. Example 2: you say "handle it", and it drafts the reply for your approval.

Example 1: Morning summary

Example 2: The assistant acts

Honestly: AI makes mistakes. An assistant works best with clear instructions and a person who checks its work.
